

Olha Korobka

Project assignment 3a

I ran the experiment a few times and tried to analyze and to understand the output of data what I received. In my experiments the lost sales were between 70 and 1999 units, with a mean of 601 and a standard deviation of 808, while service levels are between 7,01% and 23,08%, with a mean of 22% and a standard deviation of 12%.
